CORRESPONDENCE

Commissioner for Patents
Washington, D.C. 20231

Sir:

In response to the Notification of Missing Requirements Under 35 U.S.C. §371, applicant hereby encloses documents in full compliance with form PCT/DO/EO/905 including an executed Declaration and Power of Attorney and surcharge for filing of same.

In response to the Notice to Comply with Requirements for Patent Applications Containing Nucleotide Sequence and/or Amino Acid Sequence Disclosures, Form PCT/DO/EO/920, a copy of which is enclosed, please note that our records indicate that both paper and computer-readable forms (copy enclosed) of the Sequence Listing were filed at the time of filing of the patent application. Telephone calls to Ms. Shelby Vigil, of the U.S. Patent & Trademark Office on June 8, 2001 and June 14, 2001 were unable to resolve whether the United States Patent and Trademark Office records now show that the filed sequence listing and CFR were yet approved as being in compliance with 37 C.F.R. 1.821 through 1.825.

Biological Sequence Listing
Statements under 1.825(a) and 1.821(f)

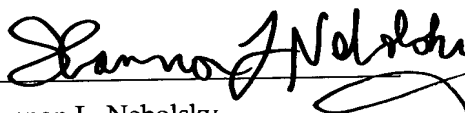

This Preliminary Amendment including Statements under 37 C.F.R. 1.825(a) and 1.821(f) is accompanied by substitute sheets for the paper copy of the Sequence Listing of the above-identified patent application. The content of the Sequence Listing is the same as that filed on November 21, 2000, which is the same as the Sequence Listing for the international application as filed in the PCT, the difference being that the format has been updated in the paper copy to conform to the current U.S. Patent Office Sequence Listing requirements with page numbers beginning at 1.

This paper is also accompanied by a write-protected diskette (3.50 inch, 1.44 Mb storage capacity) containing the computer readable form (CRF) of the Sequence Listing as ASCII output from PatentIn version 2.0. The computer readable form filename is "P30384.app". The CRF of the sequence listing was generated by the PCT-filing associate in Australia using PatentIn Version 2.0 on May 21, 1999 on a PC-compatible computer.

The PatentIn output was transmitted via e-mail and copied onto the enclosed diskette June 15, 2001 unaltered as received. The information recorded in the computer readable form is identical to the enclosed paper copy of the Sequence Listing. A copy of the Patent output was opened into a word processing program separately to produce the enclosed paper copy substitute sheets of the Biological Sequence Listing that has the appropriate page numbering. The substitute sheets include no new matter.

Respectfully submitted,

WELSH & KATZ, LTD.
